# COMPANY PROFILE

---

Marseille International Holding LLP is a limited liability partnership company based in Kolkata, India. From the humble beginning of our company, we are blessed of having a team of highly enthusiastic, experienced employees who had worked tirelessly for the development of the company since its inception.

We have associated ourselves all across the globe as proud partners with European manufacturers who work hand in hand and are best at their co-operation. The trust, reliability, and hard work of our partners helped us to develop a friendly professional relationship with our overseas partners. We have in our credit for running our projects with countries like Italy, France, London, South Africa, Dubai, Bangladesh, Sri Lanka, Nepal, and Vietnam. Our company is primarily focused on providing turnkey based business solutions and also consultation services. Turnkey business solution refers to a product or service that is complete and ready to use upon delivery without any interruption. We undertake all necessary activities needed for the project and provide a complete solution to our clients so that they are ready to turn the key to start their business ventures.

# INDUSTRIAL EQUIPMENT SUPPLIER

We work as suppliers of various industrial equipment and also provide consultation services. Apart from this, we also deal in providing high precision security services and automation services to several industries. Industrial equipment means different types of equipment or machinery that are required by any manufacturing industry for production purposes. And as an industrial equipment supplier, we concentrate on supplying all necessary equipment to industries like bakery, ice-cream, best quality packaging equipment for high capacity industries along with supplying industrial products to dairy industries.

- ✓ **BAKERY EQUIPMENT** - We are committed to supplying world-class quality equipment coupled with the latest technology, best performing, high durability machinery to bakery industries that results in high productivity, at the best price.
- ✓ **ICE-CREAM EQUIPMENT** - We are one of the leading exporters of premium quality commercial ice-cream heavy machinery in India. We pride in supplying the latest sophisticated machinery & equipment that helps to undertake the production process with ease and precision.
- ✓ **DAIRY EQUIPMENT** - We aim at supplying high precision dairy equipment coupled with modern technology that maximize the productivity and performance benefit of the manufactures.
- ✓ **PACKAGING EQUIPMENT** - We are a best-in-industry supplier of most advanced and best-in-quality, highly durable packaging materials and machinery made with superior quality raw materials to high capacity industries. Our quality assistance & marketing expertise have strengthened our presence in the packaging industry.
- ✓ **CONSULTATION SERVICES** - As a consultant, we help other business firms by giving the most reliable solutions to their business problems. We help you to get the most out of your limited resources. We are a one-stop solution to scale up your business opportunities by solving all your business problems.

# SECURITY & SURVEILLANCE SERVICES

We have also extended our service to providing high precision security and surveillance solutions. Cutting edge security involves a technological technique that involves high-level information technology developments driven by Artificial Intelligence (AI) and the Internet of Things (IoT) technologies for providing security solutions. AI along with IoT helps to analyze data, can make decisions, and can act on the decision without involvement of humans. Nowadays, we all prioritize having some extra security, so investing in cutting edge security becomes beneficial because it reduces the risk of theft, low maintenance cost, manpower dependence and also results in higher accuracy. At Marseille, we offer turnkey security services to multi-residential and commercial buildings, ensuring the integrity of access control and surveillance system. Our comprehensive state-of-art security equipment and solution help to minimize the threat of assets. Our simplified monitoring techniques control and give oversight of an entire building.

### **GPS VEHICLE TRACKING SYSTEM**

Marseille GPS Technologies also cater to specific industry domains. We ensure the best value-oriented services at a cost-effective approach that brings in the benefit of GPS Vehicle Tracking System Technologies to business. GPS Vehicle Tracking System uses Global Positioning System to track the vehicle's movement and also determines its position. Our smart tracking technology gives detailed reports & a clearer picture of the vehicle's route. It also reduces fuel cost and leads to better deliveries due to proper management of vehicles. GPS Tracking improvises vehicle security thereby minimising chances of theft. The latest technology helps us to get real time vehicle information at the tip of our finger by live tracking, real time tracking and replay tracking of the vehicles. We provide you simple & effective ways to track the vehicles. Our extensive research & round the clock customer service helps us to become the fastest-growing GPS tracking company in India. We take care of our client's vehicle so that they remain hassle-free.

# AIRCRAFT CHARTER SERVICE

Marseille also spread its wings in the aviation industry. We arrange special private jet for business travelers and also air medical evacuations across India and also international travels. We aircraft are available for rent all the time and ready to fly. We ensure you that your business travel needs are in safe hands. Our jets are well equipped that give a luxurious and truly 1st class flight experience. We are committed to security, quality, and safety of our travellers. Along with providing aircraft charter services, we also deal with the sale of small business aircraft. We also provide you with a wide choice of small business aircraft to own from that helps you to fly anywhere anytime. We go to strenuous length to maximise our customers' satisfaction. Fly anywhere at any time with Marseille aircraft charter services

# CONTACTLESS SECURITY SOLUTION

Contactless security solutions are a set of services that helps to identify objects, access control that enhances all-round security of an organization.

The contactless security solution has several benefits that drive an organization to opt for this contactless services like - it is end to end contactless; it completely gives cloud-based solution. All live feed of surveillance area is given on a centralized server. The defaulters of a specific area get an email or notification & alert on a web-based dashboard. Also, it gives us knowledge about a particular place where the probability of crowd gathering is high by tagging suspected people and recording the distance.

Our contactless security services include:

- Voice & Face recognition that helps in recording attendance
- Temperature recording
- Complete body scanning that replaces physical frisking
- Attendance recording and also virtual employee integration
- Thermal cameras to record temperature
- Metal detectors

These services incorporate technologies like AI-based Chat Box that collects symptoms and location of an individual and helps in establishing the correlation between symptoms and location that further helps to identify hotspots that strategies subsequent mitigation plan.

Our Automate Fever Screening devices can be easily set up and is user friendly. It has an integrated camera setup and does not require any external calibration sources. It gives alert on mobile app and web browser. The cough and sneeze detection mechanism helps in identifying cases of cough and sneeze from the news feed, this data further can be used to identify suspected cases and whether there is a need of the sanitisation process. Thus these reports provide better visibility that helps to maintain hygiene to prevent spread of the COVID viruses.

Our Computer vision solutions ensures proper maintenance of social distancing by leveraging the video feed coming from surveillance cameras and monitors the social distance made by people. If anyone closes the gap, an alert is sent to the concerned authorities. The Computer Vision solution also helps to identify the medical staffs who do not wear PPE and thereby sends alert to the concerned authorities. Thus the safety of the medical staffs can be taken care off in this manner.

The pedestrian walkthrough zone is completely operator free, it sends alarm notification via mobile app and also integrates security and video management systems. The Drone-based surveillance in hotspot areas identifies gathering of people in groups, ensures social distancing along with fever screening and cough detection.

The non-contact attendance through face recognition can be beneficial for any organization as it automatically records attendance through facial recognition technology. And it even does not require internet. It only requires a smartphone or laptop-based recognition. It even gives real-time alerts.

## WHY CHOOSE US

Our innovation and flexibility enables us to respond to the changing needs of our business clients and also to provide optimum performance benefit to our customers. Be it business to business or business to individual, we are always ready to serve them best quality with the best price at the right time.
